## **Proposal To Install Two Electric Vehicle Charge Points In Seal**

Seal Parish Council (SPC) is thinking of installing two public electric vehicle (EV) charge-points in the recreation ground car park, in the area close to the Memorial Hall. The charge points would be the Fast (7kW) versions, using Type 2 connectors, allowing ample time for residents to recharge their vehicles overnight, typically 4-8 hours, as well as providing a booster for visitors passing through the village. The units would be post mounted, similar to the ones shown in the photo.

Given Seal's lack of off-street parking and restricted availability for private charge-points, SPC believes that provision of public charge points would be beneficial to the community, particularly for overnight charging, and might even enable more residents to consider purchasing an EV, but we need your views please.

The installation cost would be heavily KCC subsidised, via central government grants, and the metered running costs, including ongoing maintenance and insurance against damage or vandalism, covered by a usage charge via publicly available payment mechanism, mobile app or similar. To qualify for KCC's grant though SPC needs community support.

Your response to this questionnaire would be very much appreciated.
